

Dundalk Marine Terminal

BALTIMORE, MARYLAND

BalTerm handles cargo on behalf of many of the world's largest forest product companies, including manufacturers of magazine and tissue papers.

Our experienced team uses a range of modern equipment, including the latest clamp technology, throughout our storage and distribution facilities. Our clean, paper-grade warehouses can accommodate over one million square feet of cargo.

In addition to forest products, BalTerm and its exclusive stevedoring company, Tartan Terminals, can handle other types of break-bulk at the Port of Baltimore's large and versatile Dundalk Marine terminal, including steel, project cargo, and ro-ro.
