

Bécancour QUEBEC

Ideally located between Montreal and Quebec City, the Port of Bécancour offers deep-water access and direct connections to CN rail and major highways (30, 55, 20). Integrated into a large industrial park, it supports key sectors like metals, chemicals, agri-food, and renewable energy. The port handles diverse cargo—from aluminum and fertilizers to wind components—and operates year-round. With available land and multimodal access, the Port of Bécancour is a strategic hub for industrial growth and sustainable trade.
