

Gaspé

QUEBEC

The Sandy Beach Terminal, situated on the southern shore of Gaspé Bay, commands a deep-water, sheltered berthing area (11.5–12.5 m) protected from open-sea conditions. Featuring a 200 m quay with high load capacity, it seamlessly connects to Route 132 and rail infrastructure mere metres away. Hosting CTMA cruise vessels, fuel tankers, salt carriers, and Canadian Coast Guard vessels, the terminal supports both tourism and commercial shipping. Its adjacent industrial park—with fuel services, outdoor storage, decontaminated land, and a nearby shipyard—bolsters its strategic role as a versatile maritime and industrial hub.

CHARACTERISTICS

Draft: 10 m / 33 ft.
