

# Point Comfort TEXAS

Strategically located on the Texas Gulf Coast along the Matagorda Ship Channel, the Port of Port Lavaca – Point Comfort offers efficient access to the Gulf of Mexico and global markets. Operated by the Calhoun Port Authority, the port features deepwater docks for dry bulk, general cargo, heavy-lift, and liquid products. With water depths reaching 38 feet and direct rail connections to Union Pacific via the Point Comfort & Northern Railway, it serves key industries including petrochemicals, energy, and manufacturing. Its flexible infrastructure and room for expansion make it a vital logistics hub for the South-Central U.S.
