

Sainte-Catherine QUEBEC

LOGISTEC

The Port of Côte Sainte Catherine is a versatile marine terminal on the south shore of Montréal, nestled in Sainte Catherine, Québec, along the Saint Lawrence Seaway. Operating typically from spring through December, it features two berths with a combined length of about 298 m and water depths reaching around 8 m, accommodating Seaway max vessels. Strategically intermodal, the port offers extensive indoor (21,000 m²) and outdoor (≈139,000 m²) storage, together with linked CN/CP rail access and proximity to Highway 30. Handling bulk, forest products, metals, steel and project cargo, it supports northern logistics and Arctic bound shipments, underlining its role in regional and international trade.
