

# Matane QUEBEC

The Port of Matane, situated on the south shore of the Saint Lawrence River in eastern Quebec, occupies a pivotal position roughly 400 km east of Québec City, linking the Gaspé Peninsula to the north shore via ferry and rail connections. Operated by the Société portuaire du Bas-Saint-Laurent et de la Gaspésie, it functions year-round—including with icebreaking assistance—to support intermodal trade. With rail access directly at the dock, ample open and covered storage, and capacities to handle around 300,000–700,000 tonnes annually, Matane is a robust multipurpose regional port hub.
